## Gravattone Cave - CP 834

**Municipality:** Piaggine (SA)

**Location/site:** Monte Cervati

**Car Parking coordinates:** 40°20'48.73"N; 15°26'14.26"E

**Cave coordinates:** 40°20'44.68"N; 15°26'28.40"E

**Distance from Marina di Camerota:** Km 80; 2 hours roughly

**Route from car parking:** Leave the car on the dirt road and follow it. The cave is on the right.

Ps: for the last kms the dirt road is very hard, an off-road vehicle is recommended.

**Car route:** From Piaggine municipality take the road to Sacco and turn on the right at the first paved road, 3 km after the cemetery. After 1 km turn on the right (small road) and after 1 km take the left at the crossroad. 3 km later, the road is hard for cars and is closed by a gate for cows. Leave the car and continue following the path up to the cave.

**Description:** The entrance is a majestic portal (4 m x 15 m H) reachable by the stream. After 50 m on the left there is a bypass to avoid entering in the deep water. After few meters and some jump you reach a 224-meters well, that is a connection of several spindles. Along this big well there are 4 terraces (after 5 m, 80 m, 120 m, and 200 m).

The base of the 224 m well is partially occupied by a big lake. After few jumps and going around some lakes you reach a 20 m well. On the main branch going around some big lakes you reach a 5-meters well ending with a deep lake (you need a dinghy). From this point the tunnel heads for over 100 m (NE) then for the last 120 m to NW and a lot of lakes.

The cave ends with a deep syphon-lake (8 m long) at -356 m, just after 2 very low passages.
